ANALYSIS

Profit is made after deducting the cost of sales (goods/tax + transport/sending charges, etc.).

Assuming a profit of 1000XAF is made. The cash is divided between

1. The Company
2. The Investor
3. The Buyer
4. The Seller.

In The ratio: (4:2:2:2)

Working from the above example

1. Company = 400, 2. Investor = 200, 3. Buyer = 200, 4. Seller = 200
2. **The accountant** keeps track of all activities while the Business Development Manager ensures that there is business
3. **Your (dividends)** cash may be collected after every three months.
4. **Mode of Dividends Payment:** Through Mobile Money/Orange Money/Express Union or Wire Transfer.
